- Speeds vary by region
- 24/7 x 365 customer support
- State-of-the-art WiFi included
- Large variety of speeds to meet your exact requirements
- Flexibility in IP offerings for both Dynamic and Static IP's

Business Fiber Optic Internet Access

Ethernet Internet enables you to support business-critical, bandwidth intensive applications driving key functions including customer care, process efficiency and partner collaboration. Depending on your budget, you can choose between fixed rate and usage-based options. If you need to anticipate costs and require a high, sustained rate of data transfer per month, then fixed rate (from 3-1000 Mbps) is the right option for you. If your usage fluctuates, then choosing usage-based allows you to be charged according to actual usage on a monthly basis. With E10, E100 and GigE Internet, you can access the bandwidth you need while managing costs.
